FUNDAMENTAL EQUITY OPINION KEY AND GUIDE TO YOUR BofA MERRILL LYNCH RESEARCH RATINGS

BofA MERRILL LYNCH RESEARCH

BofA Merrill Lynch Research or BofAML Research is research produced by Merrill Lynch, Pierce, Fenner & Smith Incorporated (MLPF&S) and/or one or more of its affiliates. MLPF&S is a wholly owned subsidiary of Bank of America Corporation.

Equity Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating.

BofAML Research Volatility Risk Ratings

Indicators of potential price fluctuation are:

- A** – Low
- B** – Medium
- C** – High

BofAML Research Income Ratings

Indicators of potential cash dividends are:

- 7** – Same/higher (dividend considered to be secure)
- 8** – Same/lower (dividend not considered to be secure)
- 9** – Pays no cash dividend

BofAML Research Investment Ratings

Reflect the analyst's assessment of a stock's absolute total return potential and the stock's attractiveness for investment relative to other stocks within a Coverage Cluster (defined below). There are three investment ratings:

- 1** – Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the Coverage Cluster
- 2** – Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks
- 3** – Underperform stocks are the least attractive stocks in a Coverage Cluster

Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

BofAML Research Investment Rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for Coverage Cluster+
Buy	> or = 10%	< or = 70%
Neutral	> or = 0%	< or = 30%
Underperform	N/A	> or = 20%

+Ratings dispersions may vary from time to time where BofAML Research believes that it better reflects the investment prospects of stocks in a Coverage Cluster.

A Coverage Cluster is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's Coverage Cluster is included in the most recent BofAML Comment referencing the stock.

Fixed Income Securities

Values on your statement generally are based on estimates obtained from various sources. These values assume standard market conditions, are not firm bids or offers and may vary from prices achieved in actual transactions, especially for thinly traded securities. These values are generally for transactions of \$1 million or more, which often reflect more favorable pricing than transactions in smaller amounts. You may pay more than these values if you purchase smaller amounts of securities, or receive less if you sell smaller amounts of securities.

Prices and Valuations

While we believe our pricing information to be reliable, we cannot guarantee its accuracy. Pricing information provided for certain thinly traded securities may be stale.

Investments such as direct participation program securities (e.g., partnerships, limited liability companies, and real estate trusts which are not listed on any exchange), and alternative investments (e.g., commodity pools, private equity funds, private debit funds, and hedge funds) are generally illiquid investments. No formal trading market exists for these securities and their current values will likely be different from the purchase price. Unless otherwise indicated, and except for certain alternative investment funds sponsored by affiliates of MLPF&S, the value shown on this statement for an investment in these securities has been provided by the management, administrator or sponsor of each program or a third-party vendor, in each case without independent verification by MLPF&S. This value represents their estimate of the value of the investor's interest in the net assets of the program, as of a date no more than 18 months from the date of this statement. Therefore, the values shown may not reflect actual market value or be realized upon a sale. If an estimated value is not provided, accurate valuation information is not available.

Cost Data/Realized Capital Gains & Losses

Cost Data and Realized Capital Gains/Losses are provided in this statement for informational purposes only. Please review for accuracy. Merrill Lynch is not responsible for omitted or restated data. Please consult your tax advisor to determine the tax consequences of your securities transactions. Your statement is not an official accounting of gains/losses. Please refer to your records, trade confirmations, and your Consolidated Tax Reporting Statement (Form 1099).

Insurance Policies and Annuity Contracts

Information is based on data from the issuing insurer. We are not responsible for the calculation of policy/contract values. Insurance policies and annuity contracts are generally not held in your MLPF&S account. If we, as custodian or trustee, hold an annuity contract that is a security, SIPC and excess-SIPC coverage apply.

Estimated Annual Income and Current Yield

Estimated Annual Income and Current Yield for certain types of securities could include a return of principal or capital gains in which case the Estimated Annual Income and Current Yield would be overstated. Estimated Annual Income and Current Yield are estimates and the actual income and yield might be lower or higher than the estimated amounts. Current Yield is based upon Estimated Annual Income and the current price of the security and will fluctuate.

Market-Linked Investments (MLI)

MLIs are debt securities or Certificates of Deposit linked to an underlying reference asset. They are reflected on your statement by their underlying reference asset – equities (e.g., stocks, ETFs, equity indices), alternative investments (e.g., commodities, currencies), or fixed income (e.g., interest rates). This classification method illustrates your asset allocation.
