3 - Meets Most Expectations

Meets most performance expectations, making a contribution to the organization.

Thank you for working 'Site Dashboard SharePoint for strengthen look and feel on content' and 'Sending email in wide range of varieties!' It has been a great pleasure to see you come back and active! It is critical to keep redefining our services as well as collaborating with different teams while we also find the right balance between strategy and operations to make sure our team will be ready for any transformation,

Key areas to consider for FY22 goals:

- Expand the technologies you are managing over to Power Platform and one more you choose
- Get connected proactively (leadership and initiative) on how to help the Service Desk to automate their top cases
- Continue coaching and sharing the knowledge with the rest of the team
- Structure a development plan to develop new skills or strengthen any you already have as well as designing your future role

We are living a new and exciting DXC and this will require your experience and leadership to bring yourself and your services to the next level by offering a best in class Development Center. I'm counting on you.
