in a nutshell, there are couple of great accomplishments that add significant value to company from software perspective in year of 2021. It concludes the project of travel debrief application using microsoft platform such as ms app and ms automate. Also OneClick tool is another piece of software created from scratch which includes design, heavy development, testing , deployment. Rest are countless of minor fixes in platform of sharepoint that intended to meet client needs. It scale should be 9/10 in overall rating.
