Thank you for helping us separating DXC from commercial accounts! Let's focus on documenting and deliver anything missing to be transferred from the commercial account, document and transferred anything that is operations to the operations team, keep upskilling and getting to know better all workplace services to be more active on identifying automation opportunities.

Looking forward to see you growing more into your role and thank you for all what you have and will continue doing for your own success but also for the success of our clients, our company and our team!
