

Manager

Comment**Overall Comments:**

I am pleased to report that Soon Chian has been performing exceptionally well in his role for our Governance project. His efforts in taking care of our ADO platform have been outstanding, and he has demonstrated a strong ability to work collaboratively with Microsoft and other team members. One notable strength is Soon's proactive approach to sending regular updates to leadership. This level of transparency and communication is commendable and has helped ensure that stakeholders are informed throughout the project.

However, there are two areas where I would like to see improvement:

Proactiveness in scheduling meetings : While Soon Chian has been diligent about keeping leaders updated on project progress, he could benefit from being more proactive in scheduling meetings with team members and leadership when needed. This will help avoid delays and ensure that everyone is aligned on project timelines.

Area for growth: GitHub Copilot adoption : I have been encouraging the team to explore tools like GitHub Copilot to enhance productivity. Soon's decision to use this tool shows initiative, and I appreciate his commitment to staying up-to-date with industry best practices.

Strengths:

- Excellent communication skills
- Proactive in sending regular updates to leadership
- Demonstrated expertise in using GitHub Copilot to improve productivity

Areas for Improvement:

- Scheduling meetings proactively to ensure timely project progress
- Building stronger relationships and collaboration with team members

Career and Development Aspirations and Actions:

In the near future, I would like to see Soon Chian take on a more expert role in ADO and become a resource for teaching other team members. This will not only enhance his skills but also contribute to the team's overall goal of becoming experts in Governance. With this expertise, we can help clients improve their own governance platforms and set a strong foundation for future projects.
